friends in Little Lambs.

# ***Psst! Little Lambs!***

I think I saw some lost animals in the sanctuary.

The sanctuary is a very special place.

Before you go inside, please remind your adult how to act in the sanctuary.

1. We always walk. We never run in the sanctuary.
2. We speak quietly.

You might want to hold your adult's  
hand to help them remember.

# African Violet

*African violets have beautiful flowers when they are happy and are getting enough light. They have fuzzy leaves.*

With your adult's help, you may use a one-finger touch to "pet" the violet's leaves.

# Air Plant

*Air plants don't have a typical root structure and they don't need to live in soil! (Their tiny roots are for attaching themselves to trees.)*

*They get all of their nutrients and water through their leaves.*

Adults, you may carefully lift the plant out of its holder to show your lamb it's lack of typical roots.

# Purple Basil

*Basil is an herb and is very tasty in salads, sandwiches and lots of other foods. Basil usually lives in soil. However, this basil lives in a hydroponic (water) system. Since it lives in water, it's easy to see it's root system. Basil gets its food through its roots and its leaves.*

Adults, you may lift the white plastic tray up to show your lamb the roots.

# **The Trees are Gently Swaying**

*Words & Music by Mildred Adair*

*The trees are gently swaying,  
Swaying, swaying;  
The trees are gently swaying,  
Whispering "God is love."*

*The birds are swiftly flying,  
Flying, flying;  
The birds are swiftly flying,  
Singing "God is love."*

*The flow'rs are lightly nodding,  
Nodding, nodding;  
The flowers are lightly nodding,  
Showing God is love.*
